Engineering Drafting Services

ENGINEERING SOLUTIONS

About Us

Bockdraft is a multi-disciplined engineering design office with a reputation for providing high quality, cost-effective solutions to the engineering and resource sector.

Incorporating the latest 3D design software, Bockdraft can take any project from conceptual to full design through to workshop detail fabrication drawings.

- Excellent Design Capabilities
- 3D Design Drafting
- Mine Plant Design
- Mechanical Design
- Structural Design & Detailing
- Conceptual Design & Modelling
- On-Site Support & Integration

Services

Bockdraft have completed work on iron ore, mineral sands and base metal projects and have comprehensive knowledge in the following areas:

- Infrastructure
- Mining & Process Equipment
- Mechanical & Structural Design
- Crushers
- Rotary Scrubbers and Trommels
- Vibrating Grizzlies
- Vibrating Screens
- Apron Feeders
- Conveyors
- ROM Bins
- Hoppers & Chute Work
- Pumping & Piping
- Waste Water
- P&ID

Clients

With our extensive experience in the engineering and resource sector, we have developed a close working relationship with our clients and a reputation for providing high quality, cost-effective solutions. We have completed projects for many of Western Australia's largest companies.

- BHP Billiton
- Rio Tinto
- Fortescue Metals Group
- Apex Minerals
- Iluka Resources
- Kimberley Diamond Company
- Millennium Inorganic Chemicals
- Water Corporation
- Citic Pacific Mining

Location

Bockdraft is a Western Australian based company providing engineering services nationally. Our hands on approach to engineering solutions and our willingness to travel to site to measure and confirm existing plant and equipment makes Bockdraft a valuable asset to any project.

We have the ability to undertake a variety of projects (large or small) and produce accurate, first rate drawings to the clients specifications.

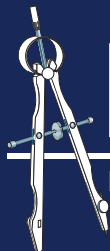

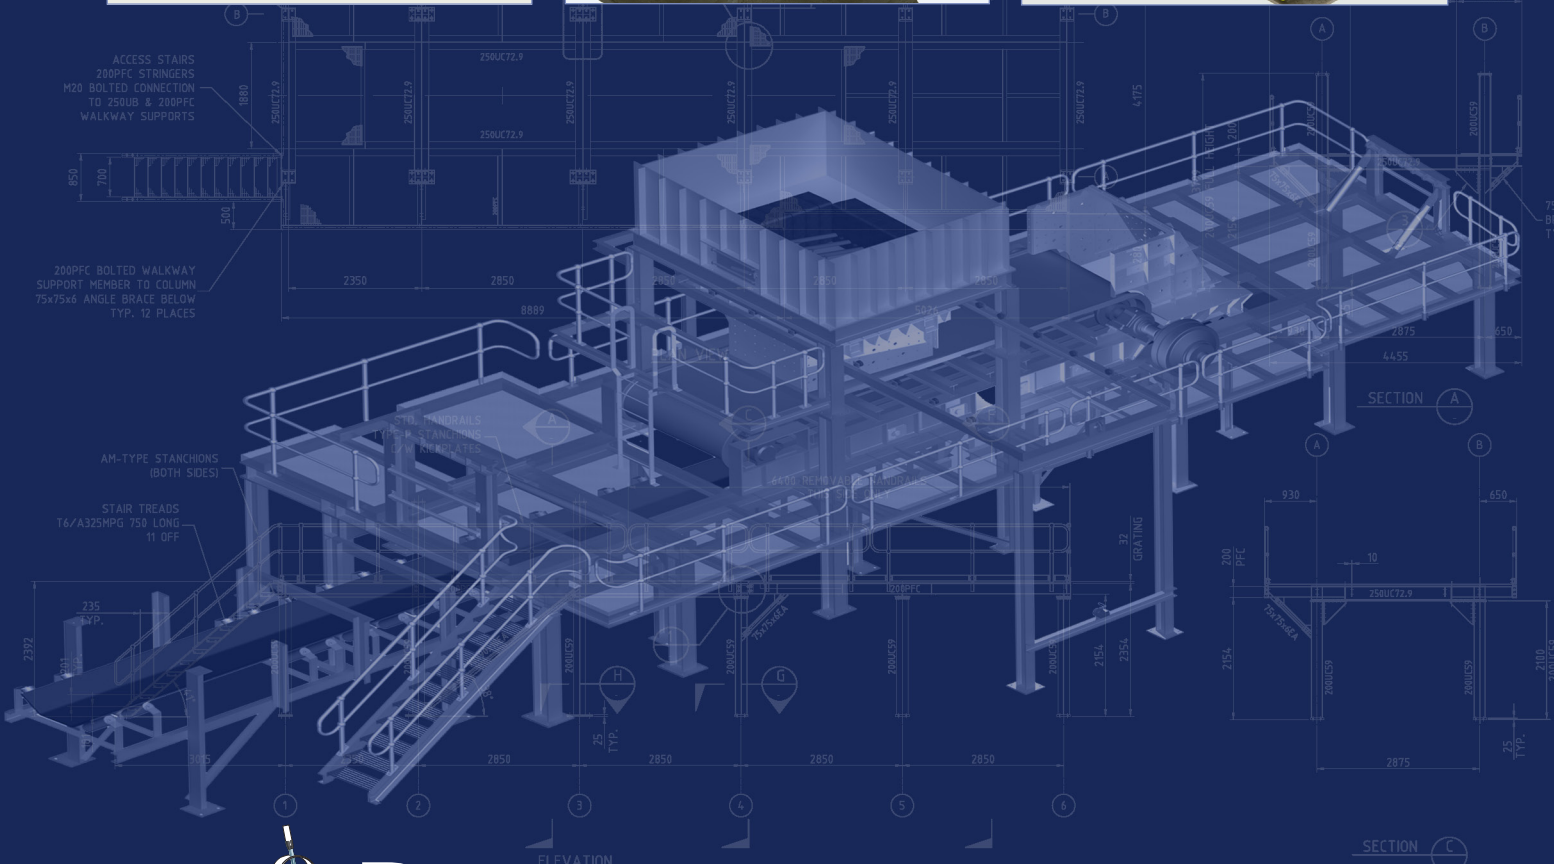

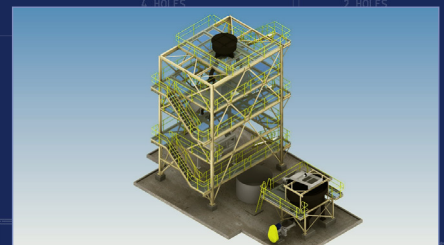

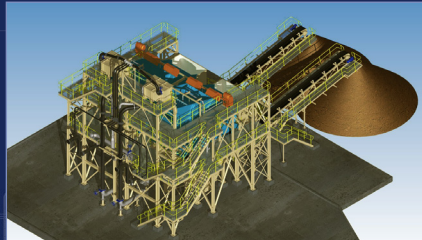

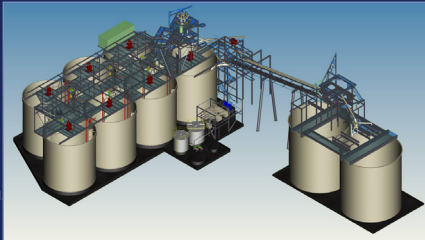

Site Services

We are able to visit you on site for project evaluation. With an emphasis on accurate site measurement and drafting, we can be on-site anywhere in Australia within 24 hours.

Whether it is a plant upgrade or integration of a new project into existing structures, Bockdraft has the capacity to follow a project from inception to completion.

Our staff regularly undergo inductions for major mining companies and maintain nationally recognised safety training.

In consultation with our clients, Bockdraft will work to ensure a clear project scope definition and can develop concept layouts, 3D models and design drawings; however, we understand that first-rate, quality fabrication drawings are what sets us apart.
